

Clarity at Versicherungskammer Group

itd Advanced Resource Planning · Jira Interface · Application Management

Solutions used: Clarity, itd Advanced Resource Planning add-on

Use cases: resource management, project management

In use since: 2015

Interfaces: Jira, SAP, P&I Loga

Deployment: IT department

Challenge

Creating a Uniform Basis for Centralized Capacity and Project Planning

- Creating a solid basis for employee resource planning
- Increasing transparency in project and line planning
- Resource and project management optimization

- Adapting the system to Versicherungskammer's individual needs
- Jira can still be used as always thanks to the automatic synchronization of data; IT department benefits from the combined strengths of both solutions
- Application management with itdesign: from support issues (such as system availability and releases) to additional development for the system

„itdesign takes care of Versicherungskammer's Clarity application management. This allows us to ensure smooth operation and focus on important internal projects.“

Martin Degener-Koziol · Responsible for IT Strategy – Topics and Processes · Versicherungskammer

Solution

Clarity with itd Advanced Resource Planning and Interfaces as a Bespoke Solution

- Implementing Clarity at the IT department and migrating existing projects and tasks to the new tool
- Taking advantage of Clarity for planning projects and mapping agile processes
- Benefit from the itd Advanced Resource Planning add-on to plan resources for the IT department
- Successful integration of existing third-party systems (e.g., SAP, Jira) via interfaces developed by itdesign

Result

More Transparent Resource Planning, High User Acceptance and Relieved IT Department

- Solid basis for increasing project and resource planning transparency and security
- Comprehensive mapping of available and planned employee capacity in Clarity as Versicherungskammer's central solution
- Expanded set of features and increased acceptance thanks to customized interfaces
- Application management by itdesign offers a high-performance system at all times and helps alleviate Versicherungskammer's IT department's heavy workload

About Versicherungskammer Group

The Versicherungskammer Group is the largest public insurer nationwide and now the seventh-largest primary insurer in Germany. In the fiscal year 2020, it generated premium income of 9.36 billion Euros. With its regional corporations, the company is active in Bavaria, the Palatinate, Saarland, Berlin, and Brandenburg. Together with the other public insurers, the health insurer of the S-Finanzgruppe operates nationwide.
